📄 CAREER OBJECTIVE

An enthusiastic and hardworking student to enhance and utilize my knowledge and skills in a team environment to build real-time projects.

📁 PROJECTS

Chat Application

- Created a real-time chat application using React.js and Firebase, enabling seamless communication with instant message delivery and updates.
- Implemented secure user authentication and authorization, ensuring personalized user experiences within the chat application.

Spotify Clone

- Created a Spotify-like music streaming platform with personalized playlists, and real-time recommendations using React.js and RapidAPI.
- It recommends music based on your mood which is a versatile feature.

Portfolio Website

- Designed a static website using HTML and CSS to showcase the talents and skills of an individual.
